TOP TEN FACTS

---
01 Various display options (desktop-ticker, pop up, status message, hyperlinks with content etc.).

---
02 Highly flexible possibilities to implement company structures through Multiuser.

---
03 Integrated LDAP interface (access and synchronization of active directories and other directory services).

---
04 Scenarios > Send different messages to different recipients at the same time with only one click.

---
05 Simple connection to other systems e.g. ITSM Suites.

---
06 Dynamic information distribution based on clientvalues (e.g. running process).

---
07 Optional double-verification principle when distributing a message.

---
08 Recipient acknowledgement and response by the user.

---
09 In case of alerting and evacuation lock the screens by a fullscreen pop up.

---
10 Mobile client connections.
